Address: Kolkata, India

I am seeking challenging opportunities where I can effectively apply my skills to make significant contributions to the success of the organization.

PROFILE SUMMARY

Dynamic Associate Software Engineer with a proven track record at Gazelle Information Technologies, specializing in digitization projects and supply chain dynamics. Excelled in developing, deploying, and optimizing the Trace-n-Track application, showcasing strong problem-solving skills and a positive attitude. Expert in Java technologies and proficient in technical support, demonstrating exemplary professionalism and efficiency.

WORK EXPERIENCE

Feb 2023 to Present

Associate Software Engineer at Gazelle Information Technologies

- Actively developed application modules, many APIs, services, and databases for the Trace-n-Track web application, ensuring alignment with project goals.
- Proficiency in development, testing, implementation, and technical support within the context of the MMI Digitization, RMPM Digitization, and WMS Digitization Live Project.
- Specialized knowledge in supply chain dynamics.
- Involved in requirement gathering for the Trace-n-Track application.
- Contributed to the planning phase of the application development.
- Assisted in the documentation of software design, coding, and maintenance procedures for future reference.
- Played a role in the testing phase, ensuring the application's functionality, reliability, and performance.
- Provided ongoing support during the commissioning phase to address any issues, and optimize the application.
- Successfully deployed the Trace-n-Track application to the server.

Jul 2022 to Sep 2022

Intern at PCS Global Pvt. Ltd.

- Developed and optimized Java web applications, enhancing user interfaces and system performance.
- Engaged in continuous learning to stay updated on Java technologies.
- Collaborated on process improvements to increase development efficiency.

SKILLS

- Spring MVC
- Hibernate
- Core java
- JSP
- Ajax
- JQuery
- SQL
- Postgresql
- MySQL
- Eclipse IDE
- IntelliJ idea
- GIT Hub
- SVN
- C
- Data Structures And Algorithms
- Operating Systems
- Pgadmin
- Workbench
- Phpmyadmin
- ER Diagrams
- Ethical hacking basic and networking
- N Map
- Linux Basic commands
- Mobile Device Manager(MDM)
- Postman Tool
- MobaXterm
- Manual Testing
- Implementation And Maintenance
- Supply Chain
- Technical Support
- Server Deployment

EDUCATION

Sanaka Educational Trust's Group of Institutions

B.Tech in Computer Science and Engineering (2023), Percentage: 85

Kuniara Sarat Nalini High School

Higher Secondary- Science (2019), Percentage: 79.2

Abadanga Gopeswar High School

Madhyamik (2017), Percentage: 64.2

OTHER SKILLS

- Positive attitude
- Problem Solving
- Time Management

COURSES & CERTIFICATIONS

- Ethical Hacking - DataSpace Academy
- JAVA - COURSERA
- SQL For Data Analytics - INTERNSHALA Training

PERSONAL INFORMATION

Address: Kolkata, India
Date of Birth: Apr 25, 2002
Gender: Male
Marital Status: Unmarried

- Hindi

OTHERS INFORMATION

- Solid Mathematical Foundation with Strong Logical Skills.
- Quick Decision-Making with a Positive Attitude.
- Exemplary Professionalism.

INTERESTS

- Recitation
- Mind Management

PROJECTS

MMI Digitization (TNT – Trace-n-Track) - Live

This application is a Java-based solution designed for inventory and tracking management, extensively implemented throughout India with multinational organizations like **Coca-Cola**.

- Developed and implemented a robust Java-based solution for inventory and tracking management, enabling real-time monitoring and management of stock, addressing the specific needs of businesses throughout India.
- Designed and engineered the core architecture of the application, ensuring scalability, reliability, and optimal performance for handling extensive inventory data from receiving new stocks to issuing them.
- Designed a robust solution for Issuance and Consumption of existing stocks and displaying the previous Consumption Reports in the system.
- Integration of the Frontend, Backend and the Database.

RMPM Digitization (TNT – Trace-n-Track) – Live

This application is also Java-based solution tailored for inventory and tracking management, specifically for monitoring raw materials and packaging materials.

- **Developed and deployed** a comprehensive Java-based system enabling real-time stock tracking and management, addressing the operational requirements of businesses across India.
- **Architected the core system** to ensure scalability, reliability, and high performance, efficiently managing large volumes of inventory data from stock receipt to issuance.
- **Seamlessly integrated** the frontend, backend, and database layers to deliver a cohesive and user-friendly experience.

Sports analytics in the IPL database, 1 Month

In this project, I must perform the job of analyzing the ball-by-ball for all the IPL cricket matches played between 2008 and 2020.

DECLARATION

I hereby declare that all the above information is true to the best of my knowledge.
